FOOTNOTES

- 1 Your child may not need this dose depending on the brand of vaccine that your healthcare provider uses.
- 2 This dose of DTaP may be given as early as age 12 months if it has been 6 months since the previous dose.
- 3 Children with certain medical conditions will need a third dose.
- **4** This vaccine may be given to healthy teens. It is also recommended for adolescents with certain health conditions.
- 5 Your teen may need an additional dose depending on your healthcare provider's recommendation.
